# THE WRIGHT EVENT

## ABOUT US

The Ian Wright Organisation (Est. 1991) is passionate about creating the perfect event experience for you or your clients. We are an event management company with an imaginative, reliable and realistic team of event managers supported by expert instructors who will ensure you get the most out of your day.

This ethic has made us one of the UK's leading specialists in the provision of entertainment and development programmes and breathtaking activity days for the corporate market and private parties.

## THE VENUE – South of England Event Centre

Looking to hire a venue for your event? Our vibrant 150-acre estate offers a host of unique event spaces, providing the ideal backdrop to any occasion.

Set in the beautiful Sussex countryside, and located just 36 miles from London and 20 miles from Brighton, we're perfectly situated in the centre of the South East region.

Whether you need a concert showground, business meeting room, exhibition space or private party venue, our showground is amazingly versatile and can be adapted for any bespoke event, large or small.

Home to the famous South of England Show, we're adept at organising events that see well over 100,000 visitors pass through our gates every year.

All the profits generated from our venue hire go directly towards supporting our charitable work to help agricultural projects including animal husbandry and forestry. We're also proud to have a 'zero' to landfill policy with all our waste recycled or converted to energy.

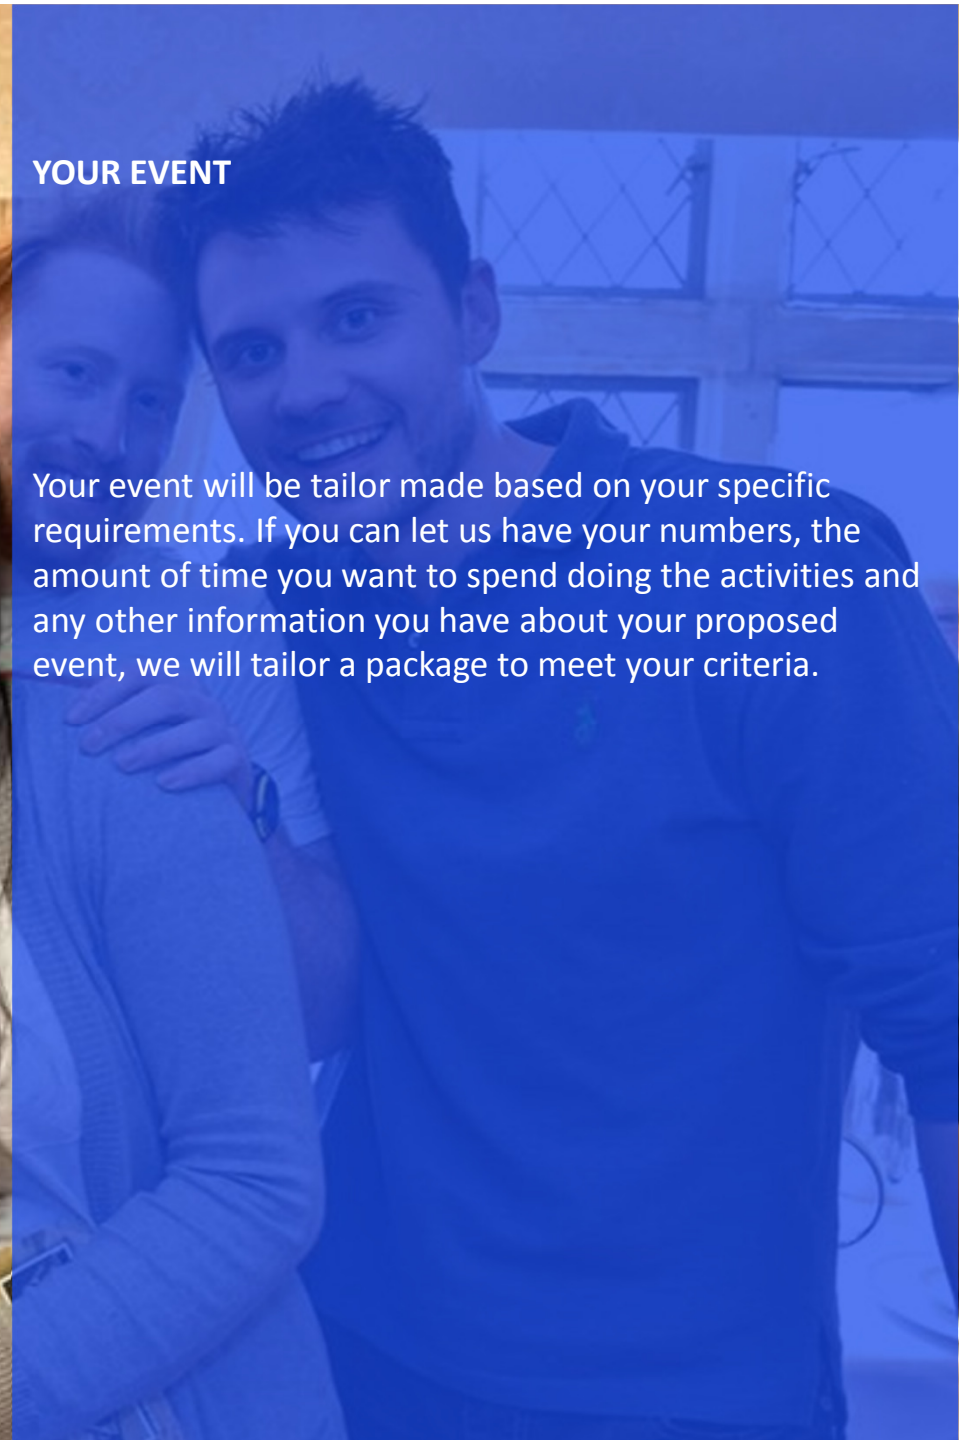

Need parking? Up to 6,000 vehicles can park for free on-site. If you're travelling by rail or air, we're easily accessible from mainline rail stations and just 11 miles from London Gatwick Airport.

## YOUR EVENT

Your event will be tailor made based on your specific requirements. If you can let us have your numbers, the amount of time you want to spend doing the activities and any other information you have about your proposed event, we will tailor a package to meet your criteria.

## THE ACTIVITIES

### Apache Rally Cars

Arguably one of the most exciting experiences you'll get! The Apache Rally Car has been designed to allow you to drive very fast and very sideways whilst in complete safety. Going sideways in style is a skill that is not only rewarding to achieve but is exciting to watch and, with our instructor sat beside you, it is a skill that you will be able to master. Once you have mastered the controlled slide you are arguably in for one of the most exciting experiences you'll get.

### Clay Pigeon Shooting

There is nothing quite like the thrill of downing a clay pigeon as it soars across the sky. At our events we offer top class tuition, so, once you have got your eye in, you'll be hitting your targets like there's no tomorrow and can promise that you are unlikely to leave us without feeling confident about your achievement.

### Quad Bike Safari

Following a full and thorough safety briefing from our qualified instructor on how to ride a quad bike safely, you will then get yourself familiar with riding a quad bike on a large coned circuit. As you gain experience you will feel able to increase your confidence and speed to a point where your instructor will then be happy to take you out on a Quad Bike Safari where you get the chance to venture out across our 200 acre estate along tracks through woods and open fields.

### Quad Bike Obstacle

Following a full and thorough safety briefing from our qualified instructor on how to ride a quad bike safely, you will then get yourself familiar with riding a quad bike on a large coned circuit.. As you gain experience you will feel able to increase your speed to a point where you will be power sliding the quad bike around the turns. This activity challenges any rider's ability to balance the bike correctly and to ride with a greater sense of coordination as the circuit has tight corners and numerous obstacles to overcome.

### **Powerturns**

These incredible machines have no steering wheels and have to be controlled by careful manipulation of the twin engine throttles. Powerturns have two engines which both independently power each rear wheel. They are controlled by two levers and can spin on their own axis. Quick acceleration will produce wheelies, giving you so much fun you will be smiling for weeks.

### **Blindfold Driving Challenge**

This is a great team event. Everyone gets the chance to drive - whilst blindfolded - with the rest of the team shouting instructions from the back on how to negotiate the vehicle around a twisting, turning track. Just to make it harder you'll be running against the clock and will get penalty points for hitting any cones on the way and you'll not be allowed to use the words "left" and "right" when giving the driver directions!

### Reverse Steer

Total confusion reigns as you drive a car that turns left when you want it to turn right. Driven around an obstacle course against the clock and with penalty points for hitting any cones on the way always ends up with hilarious results.

### Segways

These two wheeled machines will amaze you and prove a real hit with everyone who tries them. They are totally unique and hugely versatile yet very easy to operate. It only takes a matter of minutes to get used to them at which point you will be tasked with steering your Segway around a slalom course and back to the start in the quickest time possible.

### Minefield

A team of relief workers are transporting a container of life saving serum—the final obstacle to overcome is a minefield. You can see safe islands in the minefield but how will you transport the team and the serum safely between the islands? This activity requires real team work to be able to succeed.

### Rocket Launch

This activity really gets you back to those “Blue Peter” days with loads of sticky back plastic and a creative mind needed! Teams will be provided with a set of components from which they will build their rocket and rocket launcher and there will be strict rules as to what is and isn’t allowed. Once all have been completed we will hold the rocket launch grand finale. One member from each team steps forward armed only with a hand pump and sets about launching their rocket in an attempt to propel it further than all the other teams rockets... some with hilarious results.

### Egg Ballista

How far can you launch an egg? The team has to construct a launcher capable of firing an egg as far as possible. There is a variety of equipment to choose from with endless solutions to the problem. The hilarious result is finding out if your launcher will fire the eggs straight up, backwards or whether they'll just explode in mid air!

### Geese Herding

This activity is all about learning how to communicate with the Border Collies and getting them to herd geese through a course. The dogs are trained to respond to a variety of different commands and whistles and you will be amazed at how quickly you learn to control the dogs and experience a traditional part of working farm life and a taste of the countryside.

### Target Archery

The ancient sport of target archery developed in the 14th Century under King Edward III when he commanded that "all able-bodied men from the age of 16 to 65 shall practice at the butts each Sunday" and that "those strong in body shall learn the art of shooting". The basics of archery have not changed much. However, the use of modern materials now helps you develop the skill with some excellent coaching from us.

### Gun Dog Handling

Our Gundog school gives you and your colleagues a rare opportunity to control highly trained gundogs. Enjoy a lively demonstration of the dogs in action and learn about their history. Then try it for yourself, with a hands-on experience beginning with basic obedience instructions before progressing to full retrieves.

### Falconry

This ancient, noble sport is both thrilling and fascinating. The guests will enjoy a static display of many different hawks, owls and falcons, as well as experiencing the thrill of flying trained hawks from their own fist. Experience the thrill of the flight of the Falcon, the true fighter-pilot of the bird world, who's agility and speed is breathtaking as she flies to the lure, then end your session with a hands on session as our trained Harris Hawks fly to your gauntleted fist.

### Traditional Longbows

Instead of shooting at a target straight in front of you, you will be aiming at an array of life size, 3D big game targets such as Buffalo, Bears and Wild Boars. Take yourself back to medieval days when tonight's dinner depends on how you perform out in the field. Try out a variety of traditional bows, with our very own Robin Hood showing how it should be done. You'll be amazed how quickly you improve and how far you can fire an arrow!

### Competition Rifle Shooting

Many of today's best shooters started their shooting careers with air rifles. Indeed air rifle shooting has a strong and competitive following, all the way to Olympic level. The rifles we use are extremely accurate over short distances and qualified shooting instructors will supervise as you shoot from safety cages at magnetic knockdown targets.

### It's a Knockout

It's a Knockout is an impressive spectacle where participants enjoy competing on a wide range of visually stunning inflatables and hilarious games in an arena filled with high jinks and laughter. This uplifting event relieves the stresses of office life and gives individuals an opportunity to enjoy an energetic and entertaining activity with their colleagues, directly improving team interaction and morale.

### School Sports Day

Take a stroll down memory lane and return to the carefree years of the School Sports Day. Hot summer days spent on the playing fields where the Mums and Dads were itching to get out there and show the kids just how it should be done. Well now's your chance as we bring to you some of the old favorites such as the egg & spoon race, three legged race, tug of war and sack races. We will also introduce a few contemporary activities such as the ski race and space hopper race. You can now re-live those days with one of our team building school sports day events. We will provide all the activities, coloured team T-Shirts and even our own Head Master with loud hailer to take charge of this laugh out loud day of fun!

### Eco Challenge

It is the year 3008, fossil fuels ran out long ago and the planet is a very different place to live. We will design you a brief relating to your business and you will then be set the challenge to design and build an eco friendly vehicle within a set time. On completion they will be MOT'd and given marks for design after which the "Eco Challenge Grand Finale" will take place when your contraptions will be raced against each other.

Why choose

# THE WRIGHT EVENT

- We offer a wide range of activities which will suit everyone's requirements.
- We've been organising events successfully for over 25 years.
- Our clients tell us that we always exceed expectations.
- We run events from our own venue in Kent but also have a wide range of venue partners where we can operate from .

*"We had a fantastic day that was enjoyed by all. The staff were helpful and friendly and the activities were excellent fun and well organised. We can't wait to come back and try out other activities."*
